**Subject:** High Heels, Fish Loading & Work Dock Access: CDP Application 2-16-1131

**Date:** February 2, 2018 at 12:45:11 PM PST

**To:** [Dayna.Bochco@coastal.ca.gov](mailto:Dayna.Bochco@coastal.ca.gov)

Dear Chair Bochco and Commissioners,

I'm writing to oppose CDP application No. 2-16-1131.

There is ample space to locate Three Captains second hoist on the north side of the fish buyers building away from the high traffic eighteen-wheeler semi-trailer truck loading area proposed in the CDP application. The north side of the fish buyer building is the exact location that Three Captains has had two hoists for over 30 years per their lease agreement with the Harbor District.

The hoist location proposed in the CDP application will block access to the work dock located directly below it. Blocking access will have negative consequences on the commercial fishing fleet and boaters who must repair their vessels. There is no commercial boat haul out facility in San Mateo County. For this reason access to the work dock is of vital importance to the fishing industry and the boating community.

I'm providing the attached four photos of a typical busy day at Pillar Point Harbor. The fact is we have visitors in high heeled shoes dodging forklifts on Johnson Pier. We also have baby strollers, artists painting seascapes, photographers, and kids on skateboards. Everyone loves the pier.

There is a lot that could and should be done to improve access, address safety issues, modernize facilities, and renovate Johnson Pier. I strongly support the concerns raised by the Half Moon Bay Seafood Marketing Association.

Please include this email and the attached photos as a comment on the Feb 8, 2018 Agenda, Item 8, Installation of 19-foot-tall loading hoist. Please include this email and the attached photos with the staff report for CDP application 2-16-1131 on the CCC website and in the printed board packet.

Thank you,  
Sabrina Brennan  
Moss Beach, CA
